

DOWN DRAFT FUME EXTRACTION TABLE

APZEM self-contained dust collectors are designed as a workstation for capturing a wide range of materials used in grinding and finishing operations. Our Filter medias can be selected to eliminate dust from metal grinding and welding fumes. The Filtration efficiency is 98% on dust particles.

FEATURES

- Ergonomically designed for operator work
- Built in blowers and filtration system
- High airflow and pressure rates
- Filters with long life and low replacement cost
- Filter efficiency > 98%
- Lockable castors
- Small footprint
- Flexible extraction capacity
- Maintenance friendly

SPECIFICATION:

Power	3HP / Three phase power supply
Dimensions (HxWxD)	950 X 1350 X 750 mm
Noise Level	< 76 dBA*
Airflow	1500 CFM
Weight	135 kgs
Cabinet Construction	Powder coated finish upto 80 microns thickness
Filtration	Cartridge filter

ADVANTAGE :

- > Removing welding fumes at the source.
- > Efficient large filter surface and long filter lifespan.
- > Options down to 60 db(A)
- > Low Power Consumption
- > Long Filter Life

APPLICATION :

- > Welding
- > Plasma Cutting
- > Stick/MMAW welding
- > Cutting
- > Grinding

ACCESSORIES :

- > Speciality -Blended filter media
- > Pre Filter
- > HEPA kit (optional)
- > Activated Carbon (optional)
- > Backdraft kit
- > Bench vice mounting bracket
